EXPERIENCE

Byborg Enterprises, Cluj-Napoca —Frontend developer

November 2020 - PRESENT

• Led frontend development for high-traffic applications serving **10,000+ active users**, improving reliability and maintainability.
• Collaborated with cross-functional teams to design and implement features that boosted **user retention**.
• Integrated modern tooling like **Vite**, **TailwindCSS**, and **Vue3 Composition API** for faster development and better UX.

Skills:

Vue2, Vue3, Vuex, TailwindCSS, Nuxt.js, Angular, HTML, CSS, Vite, Webpack, Angular, Docker

Pentalog, Iasi —Frontend developer

April 2016 - November 2020

• Mission 2:

- Developed and maintained React components in a Kanban/Scrum workflow, contributing to **sprint velocity**

LANGUAGES

English - Proficient

Romanian - Native

increases and bug reductions.

- Wrote **unit tests (Jest, Enzyme)** and **E2E tests (Cypress)**, ensuring feature reliability.
- Participated in product grooming, sprint planning, and retrospectives to align technical and business goals.

Skills:
React, Redux.js, Jest, Enzyme, styled components, Cypress

• Mission 1:

- Delivered pixel-perfect marketing websites and responsive email templates under tight deadlines.
- Worked closely with design and QA to ensure cross-browser compatibility and responsive behavior.

Skills:
HTML5, CSS3, LESS, jQuery, PHP, React

IntelligentBee, Iasi — *Frontend developer*

June 2015 - April 2016
Skills:
React, Redux, HTML, Symfony

Vuzum, Iasi — *Frontend developer*

June 2015 - April 2016
The main responsibility was to create valid HTML5/CSS3 templates for dynamic web applications mostly using the Responsive Web Design technique ensuring the best experience regarding the platform (desktop, mobile, tablet).
Other responsibilities:
- collaborate with other team members: development, QA.
- helping the other members of the team to implement and deliver.
Skills:
HTML 5, CSS 3, Javascript (jQuery, CoffeeScript), AJAX, Responsive Web Design, GIT

EDUCATION

Universitatea Tehnica Gheorghe Asachi, Iasi — *Bachelor Degree*

October 2011 - July 2015

Degree in Information Technology.

Liceul Mihai Kogalniceanu, Vaslui — *Highschool*

September 2007 - June 2011

PERSONAL PROJECTS

TuneRequest - an app where people can request a song from DJs and give a tip. DJs have a dashboard where they see the songs and then accept or deny.
-    Tech stack: Vue + Firebase + Firestore. Plan is to rewrite it in React or Angular
-    Challenges:
    -    Bind song requests to a specific dj/event
    -     How to implement offline mode for when connection is dodgy
    -    AI based song recommendations
    -    A list of latest songs recommended from a user
    -    QR code to join users room
